木にとまるシメ

A small bird, likely a Japanese sparrow (シメ), is perched on a thick, light-brown tree branch. The bird has a brown head and back, a black throat, and a prominent, slightly curved orange beak. Its wings show a mix of brown, white, and dark blue feathers. The background is a soft, out-of-focus blue and white, suggesting a natural outdoor setting. The branch it sits on has some light-colored lichen or moss on it.
